Abstract: **Attention-deficit/hyperactivity disorder** (ADHD) is a chronic psychiatric illness, which often co-occurs with other common psychiatric problems. Although empirical evidence supports the short-term efficacy of pharmacological and behavioural treatments, families often search for alternative treatment methods because of concerns about side effects and safety, cost and access, as well as fears about long-term exposure to psychotropic medications. This review presents the published evidence on

Relevance?

Relevance \neq SEO

You need a sophisticated algorithm, which offers transparency and is fueled by outstanding metadata to bring unbiased results, valuable to the scientific process

Relevance

Exact Matches: Exact matches are favored over partial matches – considering also the field in which those words appear (abstract vs. full text vs. title, etc.)

Density: Matches across multiple metadata fields are favored for relevance scoring (more is better). The scoring influence of repeat terms within individual metadata fields is minimized.

Enhanced Subject Precision

What is it?

Enhanced Subject Precision is a **relevance ranking enhancement** for topical searches, the most common type of searching on EDS.

There are also "Figures and tables" sections with links to "Table 1", "Table 2", and "Table 3". A "Highlights" section contains three bullet points: "Lepidopteran species differ greatly in their defences against bacterial pathogens.", "Host responses also vary between closely related pathogens.", and "Care should be taken when generalizing results obtained from model systems." The "Abstract" section begins with "The insect immune system has versatile ways of coping with microbial insults. Currently, innate immune priming has been described in several invertebrates, and the first insights into its mechanistic basis have been described. Here we studied infections with two different strains of *Serratia marcescens* bacteria in two different Lepidopteran hosts. The

The screenshot shows a search results page on the EBSCO Discovery Service. The search query is "Adsorption Behavior of Nitrofurantoin onto Multi-Walled Carbon Nanotubes and Magnetite (Fe3O4)-loaded Multi-Walled Carbon Nanotubes from Aqueous Solution". The results list one item, which is a journal article from the Science Citation Index. The article title is "Adsorption Behavior of Nitrofurantoin onto Multi-Walled Carbon Nanotubes and Magnetite (Fe3O4)-loaded Multi-Walled Carbon Nanotubes from Aqueous Solution". The authors are Wu, Q; Xiong, ZH. The journal is JOURNAL OF DISPERSION SCIENCE AND TECHNOLOGY, 2015; 36; 6; p821-p830. The article is available in full-text from ISI Web of Science and PlumX Metrics. The page also shows a sidebar with filters for "Aktuális keresés" and "Korlát".

Abstract

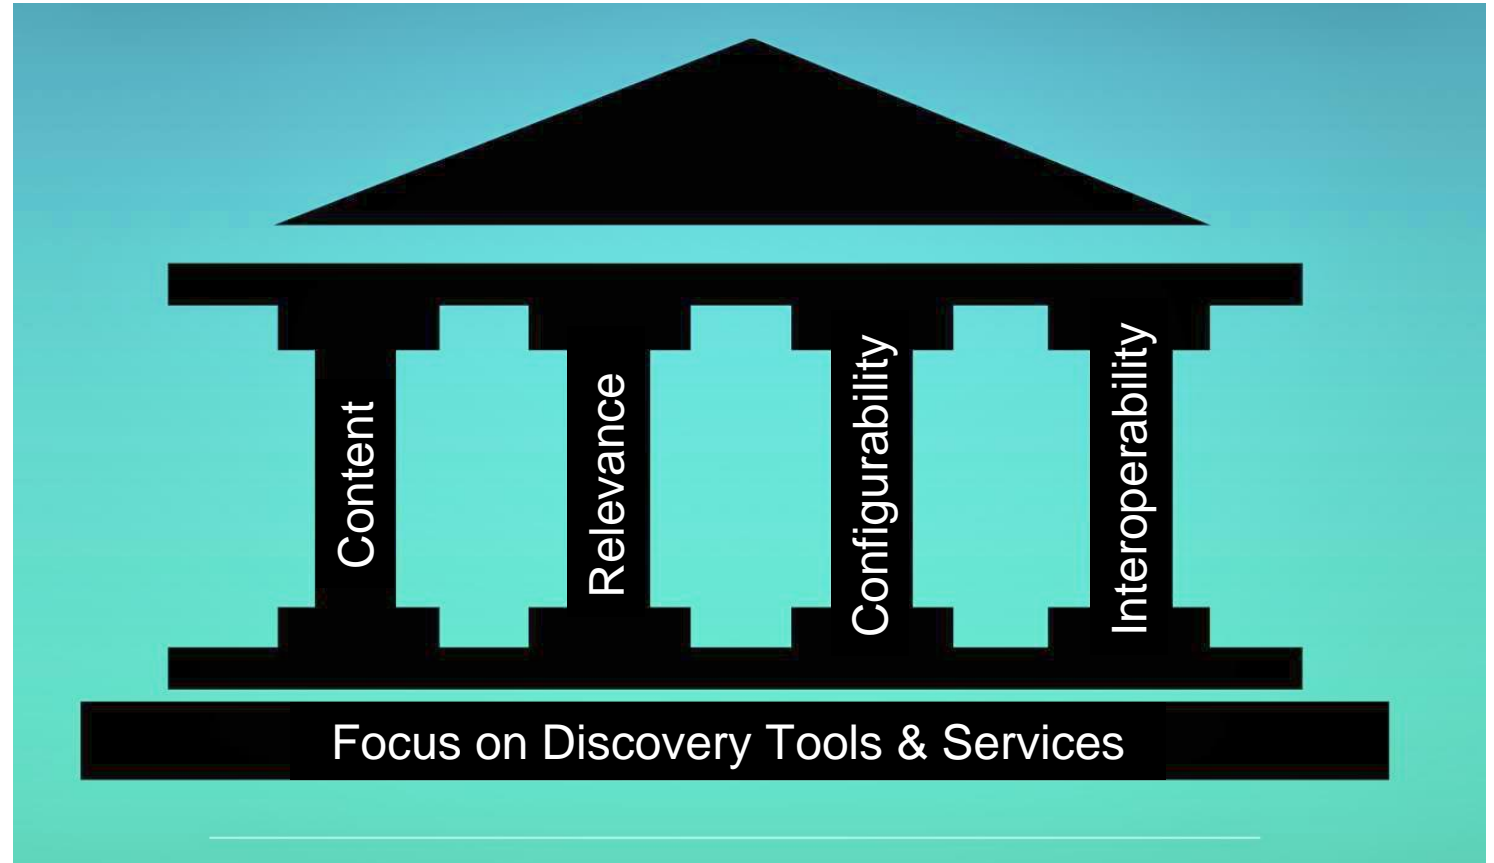

With the fast development of portable and wearable devices, flexible supercapacitor electrodes

The Original Question: How Do Your Users Succeed in Research?

The answer: Focus on...

- **Content**
 - Metadata
- **Relevance**
 - User Experience
- **Configurability**
 - Customization
- **Interoperability**
 - Integration
